# **Module Name**

**Plant Genetics** 

# Type of Module

Advanced Module

#### **Module Code**

**Plant Genetics** 

Identification Number		Workload	Credit Points	Term	Offered Ever	y Start	Duration
MN-B-SM (P 1)		360 h	12 CP	2 <sup>nd</sup> term of studying	Summer term 1st half	, Summer term only	7 weeks
1	Course Types			Contact Time	Private Study		
	a) Lectures			20 h		30 h	
	b) Tutorials			14 h		14 h	
	c) Practical/Lab			144 h		109 h	
	d) Seminar			5 h		24 h	

### 2 Module Objectives and Skills to be Acquired

Students who successfully completed this module

- have gained in-depth knowledge in up-to-date plant research topics. As this module also
  includes a section on molecular plant breeding which is co-taught by a plant breeder from a
  commercial breeding company, students will also gain transferable knowledge.
- are trained in modern techniques in advanced molecular biology, biochemistry and cell biology (see contents of the module).
- can independently carry out small scientific projects related to the topic of the module.
- have learned how to present research results in oral and written form and to critically discuss scientific publications related to the topic of the module on a professional level.
- are able to transfer skills acquired in this module to other fields of biology.

## 3 Module Content

- Theory of modern methods in molecular plant sciences (also used in other sciences)
- Plant developmental biology
- · Molecular biology of plant-environment interactions
- Biotic interactions (e.g. symbiosis with mycorrhizal fungi)
- Protein-protein interactions (e.g. co-immunoprecipitations, FRET, co-localization)
- Genetic and molecular analysis of cell-cell communication (mutant analysis, plant transformation)
- Cell imaging using fluorescent and confocal microscopy
- Analysis of reporter gene activities, particle bombardment
- Real-time RT-qPCR to analyze gene expression
- Epigenetics, histone modifications
- Other methods in modern molecular biology, biochemistry and cell biology
- Learning how to write a grant proposal

Teaching Methods						
<ul> <li>Lectures; Interactive tutorials; Practical/Lab; Seminar; Guidance to independent research; Training on writing and presentation techniques in oral and written forms</li> </ul>						
Prerequisites (for the Module)						
Enrollment in the Master's of Science degree course "Molecular Plant and Microbial Sciences"						
Additional academic requirements						
Previous attendance of the lecture module Molecular Plant and Microbial Sciences						
Type of Examination						
The final examination consists of two parts: One hour written examination on topics of lectures, seminars and the practical/lab part (50 % of the total module mark), oral presentation (20-30 min; 50 % of the total module mark)						
Credits Awarded						
Regular and active participation; Each examination part at least "sufficient" (see appendix of the examination regulations for details)						
Compatibility with other Curricula						
None						
Proportion of Final Grade						
12.0 %						
Module Coordinator						
Prof. Dr. Ute Höcker, phone 470 6897, e-mail: hoeckeru@uni-koeln.de						
Further Information						
Participating faculty: Prof. Dr. M. Bucher, Prof. Dr. U. Höcker, Prof. Dr. M. Hülskamp, Dr. F. Turck						
Literature:						
Information on recommended textbooks and other reading material will be given on the ILIAS representation of the course (see https://www.ilias.uni-koeln.de/ilias/goto_uk_cat_2815610.html)						
<b>General time schedule:</b> Week 1-5 (MonThu./Fri.): Lectures, tutorials, practical/lab and writing exercises. Week 6 (MonFri): Preparation for the seminar talk (held at the end of week 6); Week 7 (MonFri): Preparation for the written examination						
<b>Note:</b> The module contains hands-on laboratory work conducted in groups of max. two people and is taught in a course room fully equipped with up to date research technology. The module does contain computer-based practicals/research as one main component.						
<b>Introduction to the module:</b> April 8, 2024 at 9.00 a.m., Cologne Biocenter, room 4.004 (fourth floor) or online (in this case, further information/link will be sent to your Smail-Account); for preparation to the module before this introduction see ILIAS link under literature.						
<b>Written examination:</b> May 31, 2024, second/supplementary examination August 02, 2024; the latter date may vary if students and module coordinator agree. More details will be given at the beginning of the module.
