

Neural Function I: From Experiments to Analysis					
Identification number	Workload	Credit points	Term of studying	Frequency of occurrence	Duration
MN-B-SM (N 2)	360 h	12 CP	1 <sup>st</sup> or 2 <sup>nd</sup> term of studying	Summer term, 1 <sup>st</sup> half	7 weeks
1	<b>Type of lessons</b>		<b>Contact times</b>	<b>Self-study times</b>	<b>Intended group size*</b>
	a) Lectures		20 h	40 h	max. 16
	b) Practical/Lab		100 h	160 h	max. 2
	c) Seminar		10 h	30 h	max. 16
2	<b>Aims of the module and acquired skills</b> Students who successfully completed this module ... <ul style="list-style-type: none"> <li>• have acquired an understanding of how intrinsic membrane properties shape specific functional neuronal phenotypes.</li> <li>• have acquired a solid understanding of important cellular electrophysiological methods.</li> <li>• are able to apply intracellular recording and imaging techniques used in neurobiology (see contents of the module) and are able to independently design and perform small scientific projects related to topics of the module.</li> <li>• have acquired basic programming skills with the high level programming language Matlab.</li> <li>• are able to analyze electrophysiological data using Matlab and the Spike 2 software package.</li> <li>• have learned how to present research results in oral and written form and to critically discuss scientific publications related to the topic of the module on a professional level.</li> <li>• are able to transfer skills acquired in this module to other fields of biology.</li> </ul>				
3	<b>Contents of the module</b> <ul style="list-style-type: none"> <li>• Basic properties of excitable membranes</li> <li>• Functional analysis of membrane properties and neuronal activity</li> <li>• Intracellular recordings of neuronal activity</li> <li>• Analysis of synaptic interaction of neurons</li> <li>• Pharmacological analysis of membrane properties</li> <li>• Intracellular staining techniques and fluorescence microscopy</li> <li>• Analysis of electrophysiological data with Matlab</li> </ul>				
4	<b>Teaching/Learning methods</b> <ul style="list-style-type: none"> <li>• Lectures; Practical/Lab (Project work); Seminar; Computer exercises with Matlab; Guidance to independent research; Training on presentation techniques in oral and written form</li> </ul>				
5	<b>Requirements for participation</b> Enrollment in the Master's degree course "Biological Sciences" or in the Master's degree course "Klinische und Experimentelle Neurowissenschaften"  <b>Additional academic requirements:</b> Participation in an advanced neurobiology/animal physiology course within a bachelor's program (e.g. MN-B-WP I [Neuro 1] at University of Cologne) is highly desirable. Alternatively, we strongly recommend attending the module <i>Essentials in Neuroscience</i> of the MSc Biology program in the winter term. The knowledge of neurobiology on the level of a general biology text book (Campbell or Purves) is absolutely required.				

*Neural Function I: From Experiments to Analysis (MN-B-SM [N 2]) continued*

6	<p><b>Type of module examinations</b></p> <p>The final examination consists of two parts: Two hours written examination about topics of the lectures, the practical/lab part and the seminars (70 % of the total module mark) and oral presentation (30 % of the total module mark)</p>
7	<p><b>Requisites for the allocation of credits</b></p> <p>Regular and active participation; Passed seminar paper Each examination part at least "sufficient" (see appendix of the examination regulations for details)</p>
8	<p><b>Compatibility with other Curricula*</b></p> <p>Elective module in the Master's degree course "Klinische und Experimentelle Neurowissenschaften"</p>
9	<p><b>Significance of the module mark for the overall grade</b></p> <p>In the Master's degree course "Biological Sciences": 15 % of the overall grade (see also appendix of the examination regulations)</p>
10	<p><b>Module coordinator</b></p> <p>PD Dr. Joachim Schmidt, phone 470-6135, e-mail: joachim.schmidt@uni-koeln.de</p>
11	<p><b>Additional information</b></p> <p><b>Subject module</b> of the Master's degree course "Biological Sciences", <b>Focus of research:</b> (N) Neurobiology</p> <p><b>Participating faculty:</b> Prof. Dr. A. Büschges, Dr. T. Bockemühl, Dr. M. Gruhn, Dr. S. Hess, Prof. Dr. P. Kloppenburg, Prof. Dr. M. Nawrot, PD Dr. J. Schmidt</p> <p><b>Literature:</b></p> <ul style="list-style-type: none"> <li>• Information about textbooks and other reading material will be given during the course</li> </ul> <p><b>General time schedule:</b> Week 1-6 (Mon.-Fri.): Lectures, practical/lab and preparation for the seminar talk (held at the end of week 6) as well as writing seminar paper; Week 7 (Mon.-Fri): Preparation for the written examination</p> <p><b>Note:</b> The module contains hands-on laboratory work conducted individually and is taught in course rooms. The module does not contain computer-based practicals/research as a main component.</p> <p>The teaching language of the course is English.</p> <p><b>Introduction to the module:</b> April 06, 2020 at 9:00 a.m., Cologne Biocenter, room 1.007 (first floor); for preparation to the module before this introduction see advice(s) under literature</p> <p><b>Written examination:</b> May 22, 2020, second/supplementary examination July 31, 2020; the latter date may vary if students and module coordinator agree. More details will be given at the beginning of the module.</p>

\* 11 students from the Master's degree course "Biological Sciences" and 5 students from the Master's degree course "Klinische und Experimentelle Neurowissenschaften".
